

Definition of Done

In order to deem a user story/feature complete, it must meet all requirements below, or in the case of niche requirement, all that are relevant. The GoBooking team will follow these defined requirements to mark a feature as done.

- Design of mock-ups are reviewed and approved by the client
- Code is complete
- Code is refactored and documented
- Code contains no identified errors and defects
- Code is reviewed and approved by the team
- Code is deployed (test and host environment)
- Unit Tests passed
- Function Tests passed
- Regression Tests passed
- Acceptance Criteria passed
- No known failures and uncertainties
- All associated documentation is updated accordingly to any new changes
- Checked and accepted by the Product Owner
- Accepted by the client and stakeholders
- The development team approves that the completed feature correctly covers the user story without leaving anything incomplete or missed
- Code pushed to repository
